

# 1400 Bay and Bow Window For Remodeling and Replacement Applications

## Bay & Bow Windows add another dimension to your living space

Series 1400 Bay and Bow windows combine a number of structural design innovations that make them the window of choice for homeowners looking for energy efficiency and worry-free function to last for decades. Our unique interlocking system permanently secures each window section, one to the other. Steel rods between each window section secure the entire interlocked unit to the home using our factory installed turnbuckle and clamp cable support system.

Bay and Bow windows are constructed using our Series 1600 Casement or Series 1100 "ULTRA" Double Hung windows. The flanking windows of a bay window can be angled at either 30 or 45 degrees. Bow windows allow you to put

three, four or five casement windows together at 10 degree angles.

With an unparalleled combination of visible light transmittance, energy-saving solar control and a clear glass appearance, Solarban® 70 XL Solar Control Low-E Glass represents the most dramatic advance in window glass in more than a decade.

This revolutionary Solar Control Low-E glass allows homeowners to

cut summer cooling costs by as much as 25% while enjoying all the benefits of abundant interior sunlight and a clear, color-neutral glass appearance.
